Letter:

A proposed grain storage facility will be filled via trucks which will dump into portable augers. Is this subject to Subpart DD?

Section 60.301(b) defines the term grain elevator as any "plant or installation at which grain is unloaded, handled, cleaned, dried, stored or loaded." The regulations apply to a facility performing one or more of these operations. Since the facility at issue is involved in loading, unloading and storage, it is subject to the standard.
